Education

Cambridge, MA Expected 2022	**Harvard University** PhD Candidate in Computer Science › Department of Energy Computation Science Graduate Fellow (DOE CSGF) · Siebel Scholar · 3.96 GPA › Thesis: *Distributed Perception and Decision-making for Inspection by Autonomous Robot Collectives*
London, UK 2016	**Imperial College London** Master of Research (MRes) in Bioengineering, with Distinction › Marshall Scholar › Thesis: *Assisting Balance Recovery with a Lower Limb Exoskeleton*
Boston, MA 2015	**Northeastern University** BS in Behavioral Neuroscience, Minor in Computer Science › Goldwater Scholar · summa cum laude · 3.98 GPA

Skills

Computer Science	Algorithm development · Python · C/C++ (including embedded programming and Arduino) · Robot Operating System (ROS) · Linux · Git/version control · MATLAB · JavaScript
Engineering & Fabrication	Computer-aided design (OnShape, Fusion 360) · Electronics design (Eagle) and production · 3D printing · CNC milling · Soldering · Laser cutting · Molding and casting

Research Experience

Cambridge, MA 2016 –	**Harvard University Self-Organizing Systems Research Group,** Prof. Radhika Nagpal PhD research assistant › Developing a framework for collective spatial decision-making in simulated and physical robot collectives. Includes developing bio-inspired and Bayesian decision and movement algorithms, and robust low-bandwidth communication. › Created Kilosim, an open-source multi-robot simulator (C++) capable of efficiently simulating hundreds of robots at up to 1000x real time. › Collaborating with MIT Media Lab to create heterogeneous robot swarm for inspection on space stations, including algorithm development and hardware testing in microgravity (Zero-G flights). › Designing and manufacturing LARVAbot: a collective of bioinspired robots to perform aggregate locomotion. Includes electronic, mechanical, and algorithm design.
Livermore, CA 2018 –	**Lawrence Livermore National Laboratory,** Dr. Michael Schneider Summer internship, ongoing collaboration › Designing multi-agent algorithms for orbit tracking (space situational awareness, SSA) and maneuver detection with satellite constellations. › Programmed, refactored, and documented research codebase (Python) for SSA, now used extensively by SSA researchers at LLNL. › Developed a simulator and visualization tools (Python) for collective orbit observation by low earth orbit satellites.
London, UK 2015 – 2016	**Imperial College Human Robotics Group,** Prof. Etienne Burdet and Dr. Ildar Farkhatdinov Post-graduate research assistant › Developed algorithms for human-robot co-control of the LOPES exoskeleton in standing a walking balance recovery. Tested with human participants and modeled in Simulink.

Boston, MA	**Northeastern University Action Lab,** Prof. Dagmar Sternad
2011 – 2015	Undergraduate research assistant, including 6-month co-op

› Programmed HapticMaster robot (C++) and conducted human-subject experiments control of objects with complex dynamics, resulting in two publications.
› Designed and programmed (Matlab) experiments to assess ability of humans to learn and retain a motor task with rhythmic and discrete components. Conducted multi-month data collection (including with EEG) and analyzed results for Honors thesis.

Tübingen, DE	**Max Planck Institute for Intelligent Systems,** Prof. Stefan Schaal
July – Dec. 2013	Research co-op

› Designed and programmed a learning task in which subjects learned to map high-dimensional hand joint movements to move a 2D cursor.
› Conducted human subjects experiments and presented results at Neural Control of Movement conference.

Teaching & Mentoring Experience

Cambridge, MA	**Harvard University**
2021	› **Co-supervisor,** ETH masters thesis on swarm inspection algorithms
2018 – 2021	› **Teaching staff,** How To Make (Almost) Anything, Harvard section (3 semesters)
Summer 2019	› **REU mentor** for Kilobot research and outreach project
Spring 2018	› **Teaching fellow,** CS 189: Autonomous Robot Systems ⊘
Boston, MA	**Northeastern University**
2014 – 2015	› **Teaching assistant,** CS 2500: Fundamentals of Computer Science (2 semesters)
2012 – 2014	› **Tutor,** CS 2500: Fundamentals of Computer Science (3 semesters)
2011 – 2013	› **Undergraduate mentor,** Proactive Recruitment in Science and Mathematics (PRISM)

Interests & Activities

Outreach	NPR *Brains On* podcast guest · FIRST Lego League judge · Harvard *Science in the News* public lecture
Personal	Curling (Harvard club curling team) · Web design & development · Open source 3D print models
